

ERA Extreme³ Shootbolt Window Lock

Features

- A shootbolt locking system that has been designed to prevent attack on all 3 planes - back and forward, side to side, and up and down giving unattainable levels of security
- Non-croppable shootbolt locking system with a minimum of 8 points locking giving you the ultimate burglar deterrent
- Heavy duty bolt has up to 300% of the contact area against competitor shootbolts thus providing the most secure shootbolt on the market
- Central part of the lock utilises a rugged steel deadbolt which fits into a specially designed nylon keep with a hardened steel plate for optimal security and resistance to attack
- Two steel cams on the Shootvault(TM) slide into a central keep to provide additional security on either side of the deadbolt
- Patented docking system of the bolt into the keep ensures smooth operation and prevents sideways movement of the bolt when under attack
- Compatible with standard zinc espag keeps or the unique Power Brace keeps; that have a weather resistant nylon base combined with a 2mm hardened steel plate for significantly increased performance
- Upgrade to enhanced security with 3D locking pins fitted to the shootbolt and extended Power Brace keeps for up to 11 locking points

(please see additional information sheet for details of Shootbolt Extension sizes)

NB: Shootbolt Extensions - 'X' within part code to be substituted with shootbolt bar number required.

Usually 11mm = 13mm profile stack heights, 15mm = 17mm profile stack heights

Technical Information

Corrosion resistance

Meets the requirements of BS EN 1670:2007 Grade 4 (240 hours)

Operation

Tested in excess of 50,000

Performance

Tested independently to 6000n force, twice that of the usual PAS24:2012 test requirements

Material Specification

Bars:	High quality steel, Zinc plated, Trivalent passivated and seal
Keeps:	High quality steel, Zinc plated, Trivalent passivated and seal or Composite keeps with steel top plates
Shootbolts:	High quality steel

Packaging

Locking Bars

20 locks per box

Shoot Plates

100 pairs per box

Cam Keeps

125 keeps per box

Shoot Extensions

25 per box

Centre Keeps

100 per box

3D Cam

500 per box

Shoot Keeps

60 pairs per box

3D Plates

100 per box

Maintenance

All moving parts should be lightly lubricated using a light non-acidic mineral oil (e.g "3 in 1") twice per year and the surface cleaned with a soft damp cloth. The product may need to be adjusted and fixings tightened to ensure a satisfactory operation.
